Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Include only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

TABLE 4. Percent Distribution of Commodities, by Production Area of Destination: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries) parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products for refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. X Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

CHART 1.

OHIO | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

OHIO | Shipments, by Geographic Division of Destination: 1972

(Based on thousands of tons)

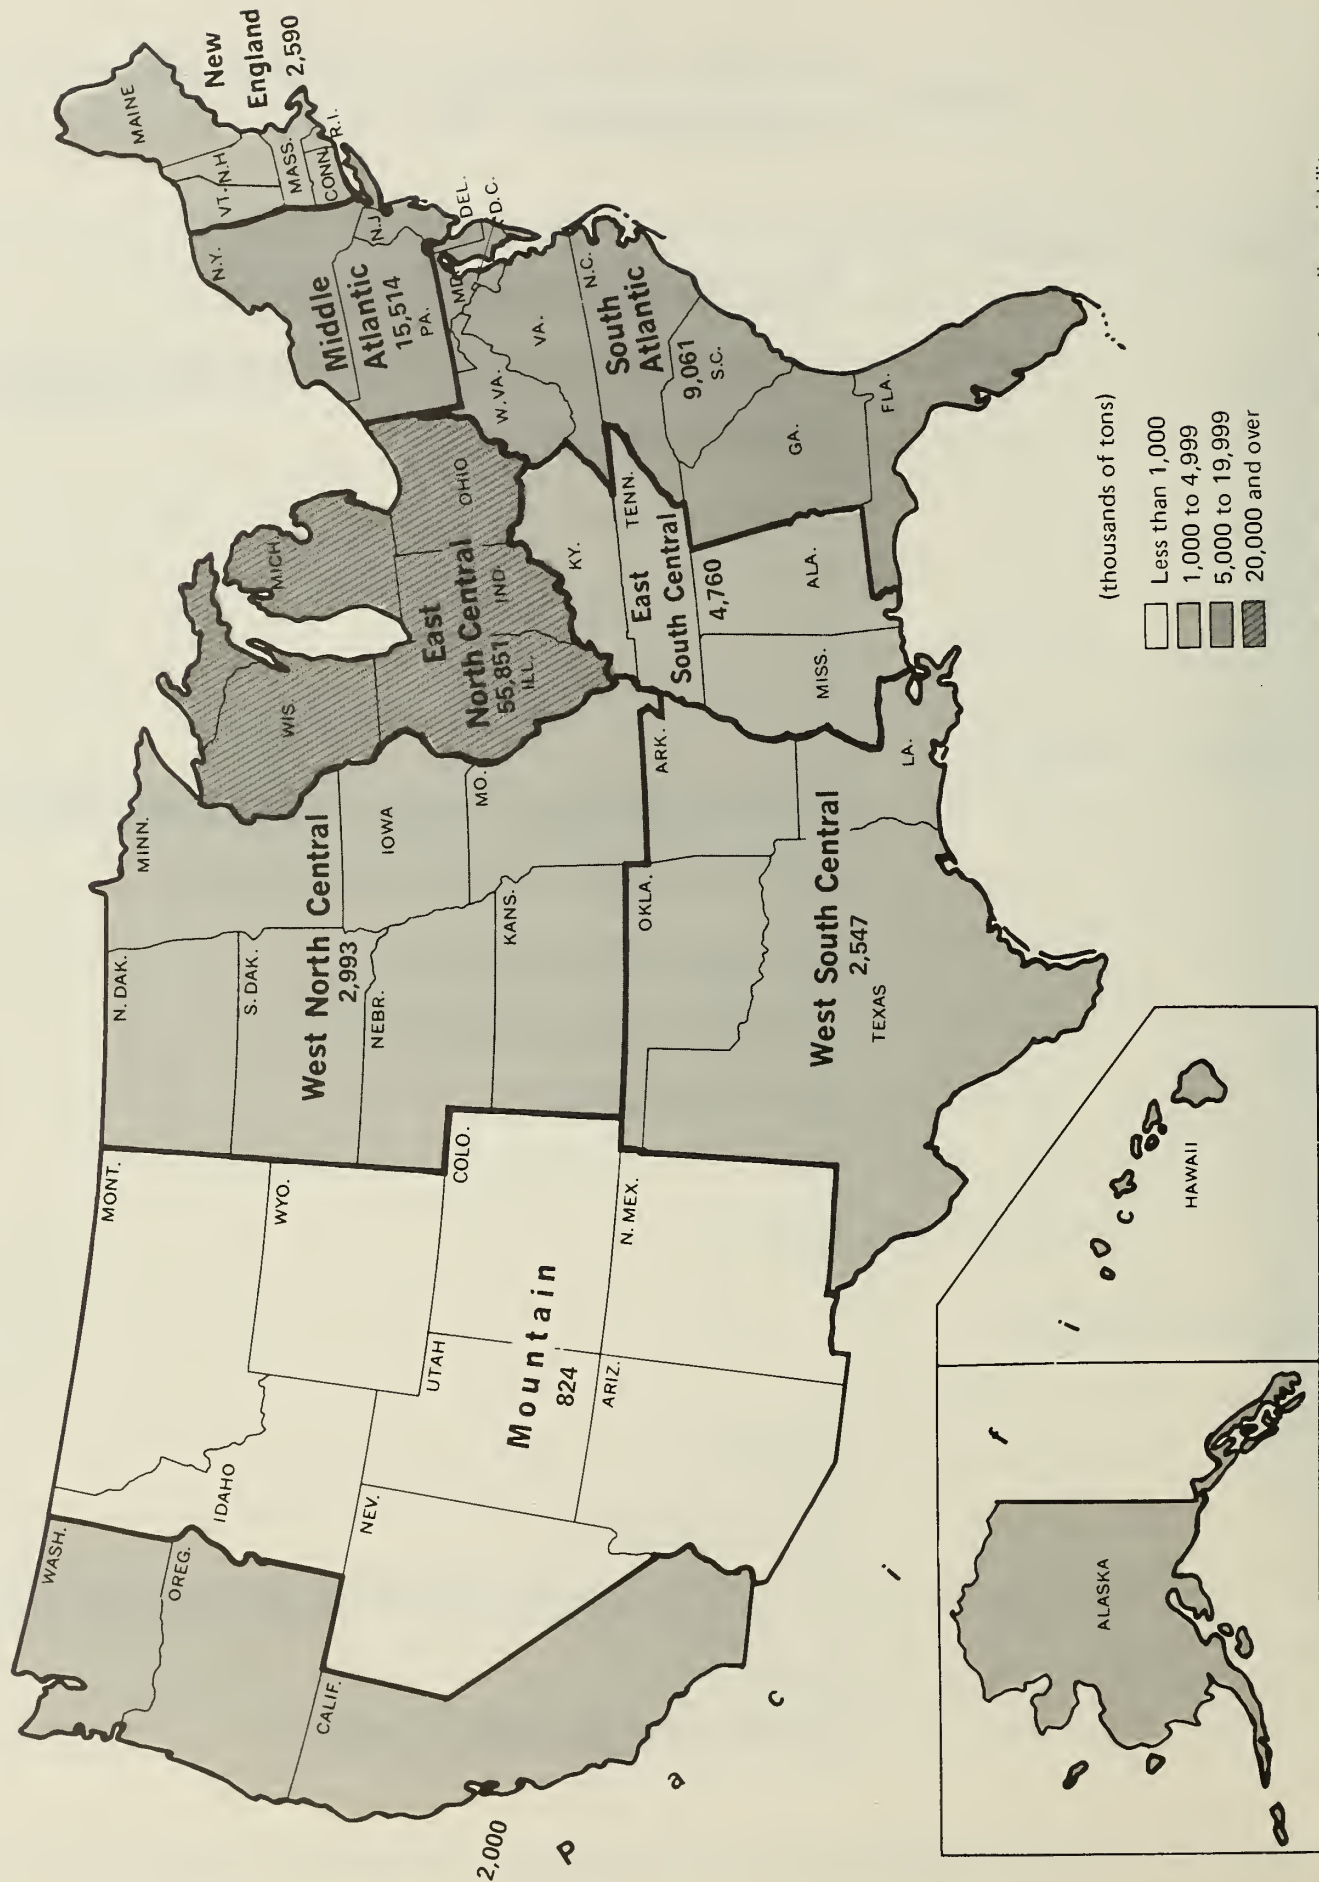

TABLE 1. Percent Distribution of Commodities Shipped to Geographic Divisions, by Means of Transport: 1972

A. Tons of Shipments

TCC code	Division of destination and commodity	Number (thousands of tons)	Percent distribution by means of transport								Unknown	Sam- pling var- iability
			All means of transport	Rail	Motor carrier	Private truck	Air	Water	Other

----	ALL OTHER MISCELLANEOUS.	2,028	100.0	70.0	24.5	3.8	.5	.2	1.1	.3
-----	ALL OTHER MISCELLANEOUS.	2,892	100.0	70.0	25.2	3.3	.4	.1	1.0	.2

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

TCC code	Commodity	A. Tons of Shipments								
		Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sampling variability
	TOTAL	86,249	100.0	.9	7.9	13.2	43.8	7.2	27.3	10

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Production Area 11—Continued

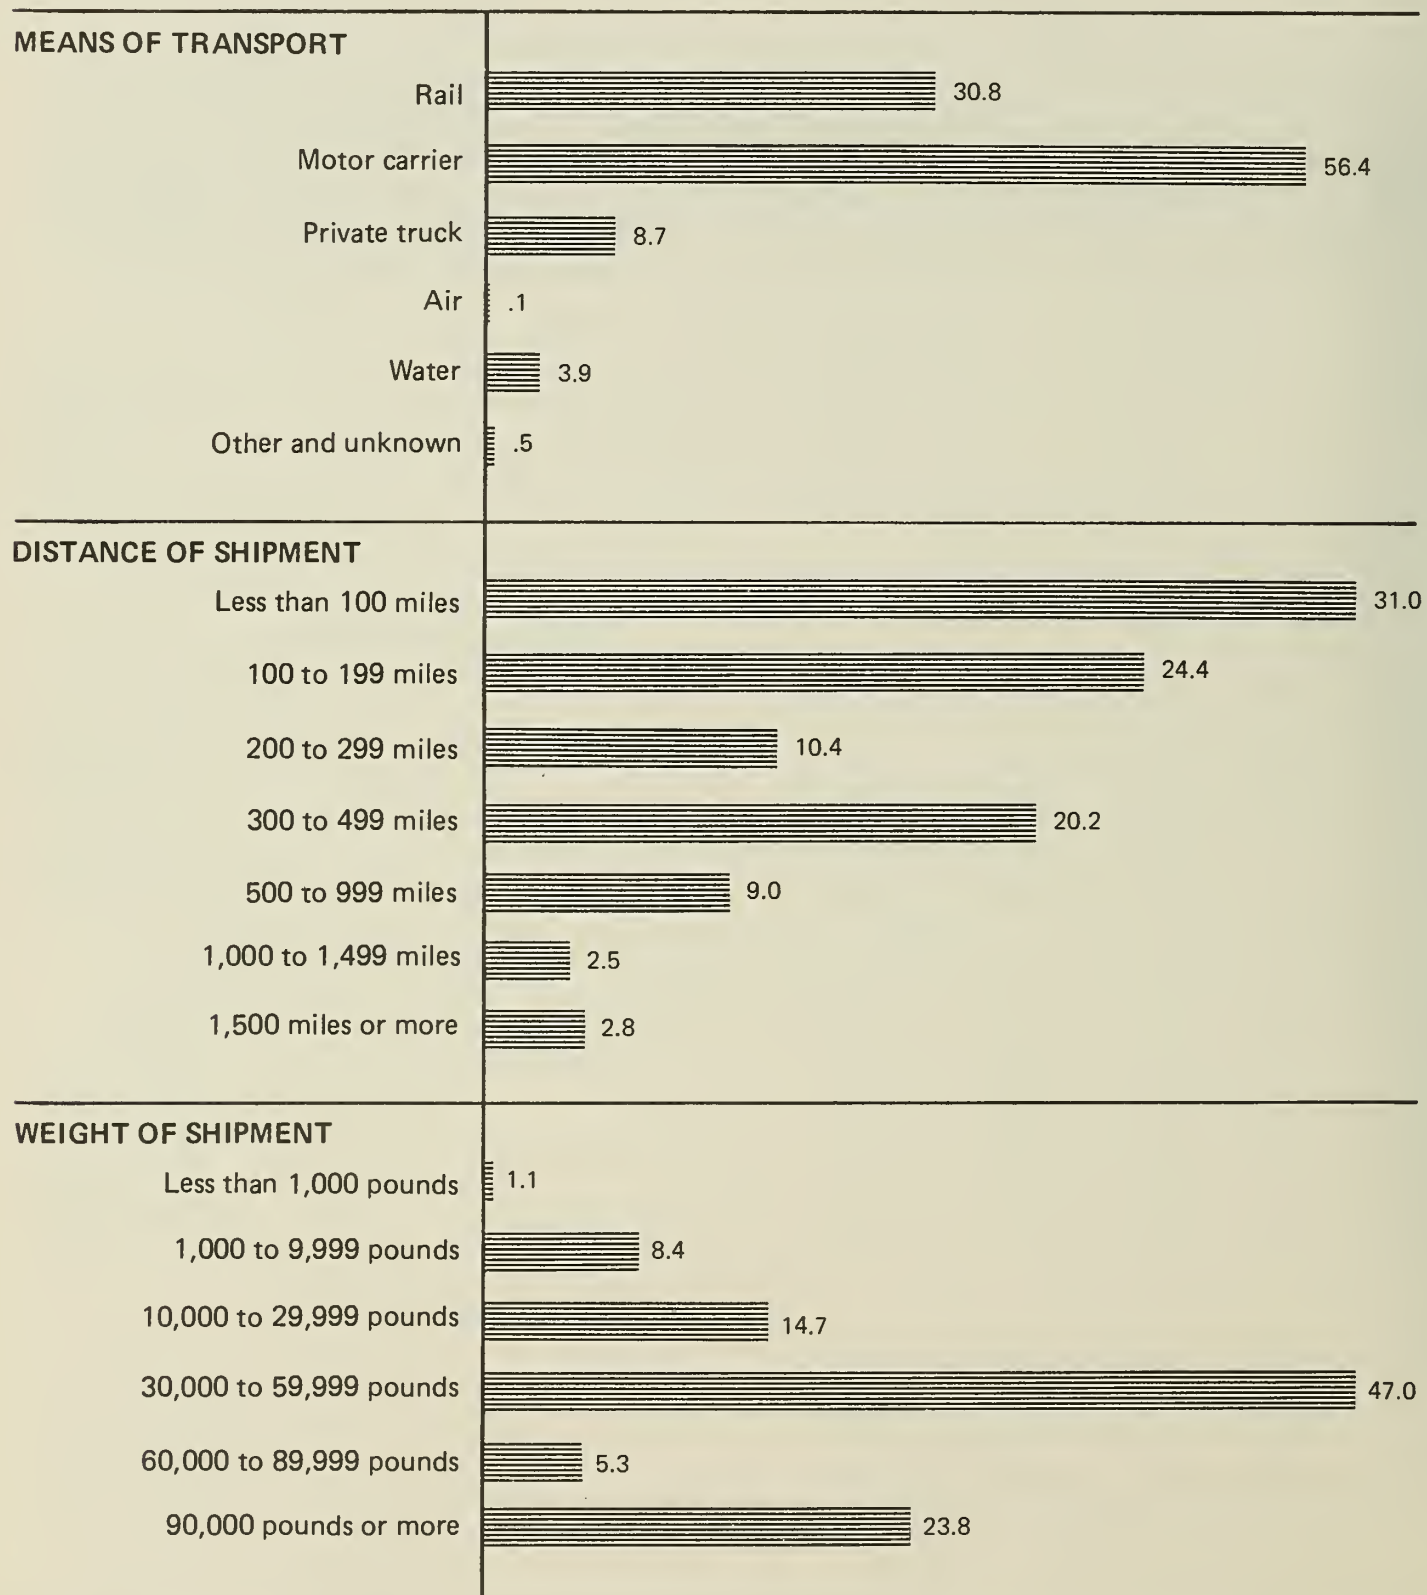

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated building, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

TABLE 4. Percent Distribution of Commodities, by Production Area of Destination: 1972

A. Tons of Shipments											
TCC code	Commodity	Number (thousands of tons)	Percent distribution by production area of destination								
			Total	1 (BOST)	2 (HART)	3 (NYNY)	4 (N.NJ)	5 (PHIL)	6 (BALT)	7 (ALLN)	8 (HARR)

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

- Represents or rounds to zero. (X) Not applicable.

Production Area 13—Continued

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

TABLE 1. Percent Distribution of Commodities Shipped to Geographic Divisions, by Means of Transport: 1972—Continued

B. Ton-Miles of Shipments

(Footnotes for table 18)

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookiea and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719 and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								Sampling variability
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 39721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

TABLE 4. Percent Distribution of Commodities, by Production Area of Destination: 1972

A. Tons of Shipments

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

(X) Not applicable.

Production Area 14—Continued

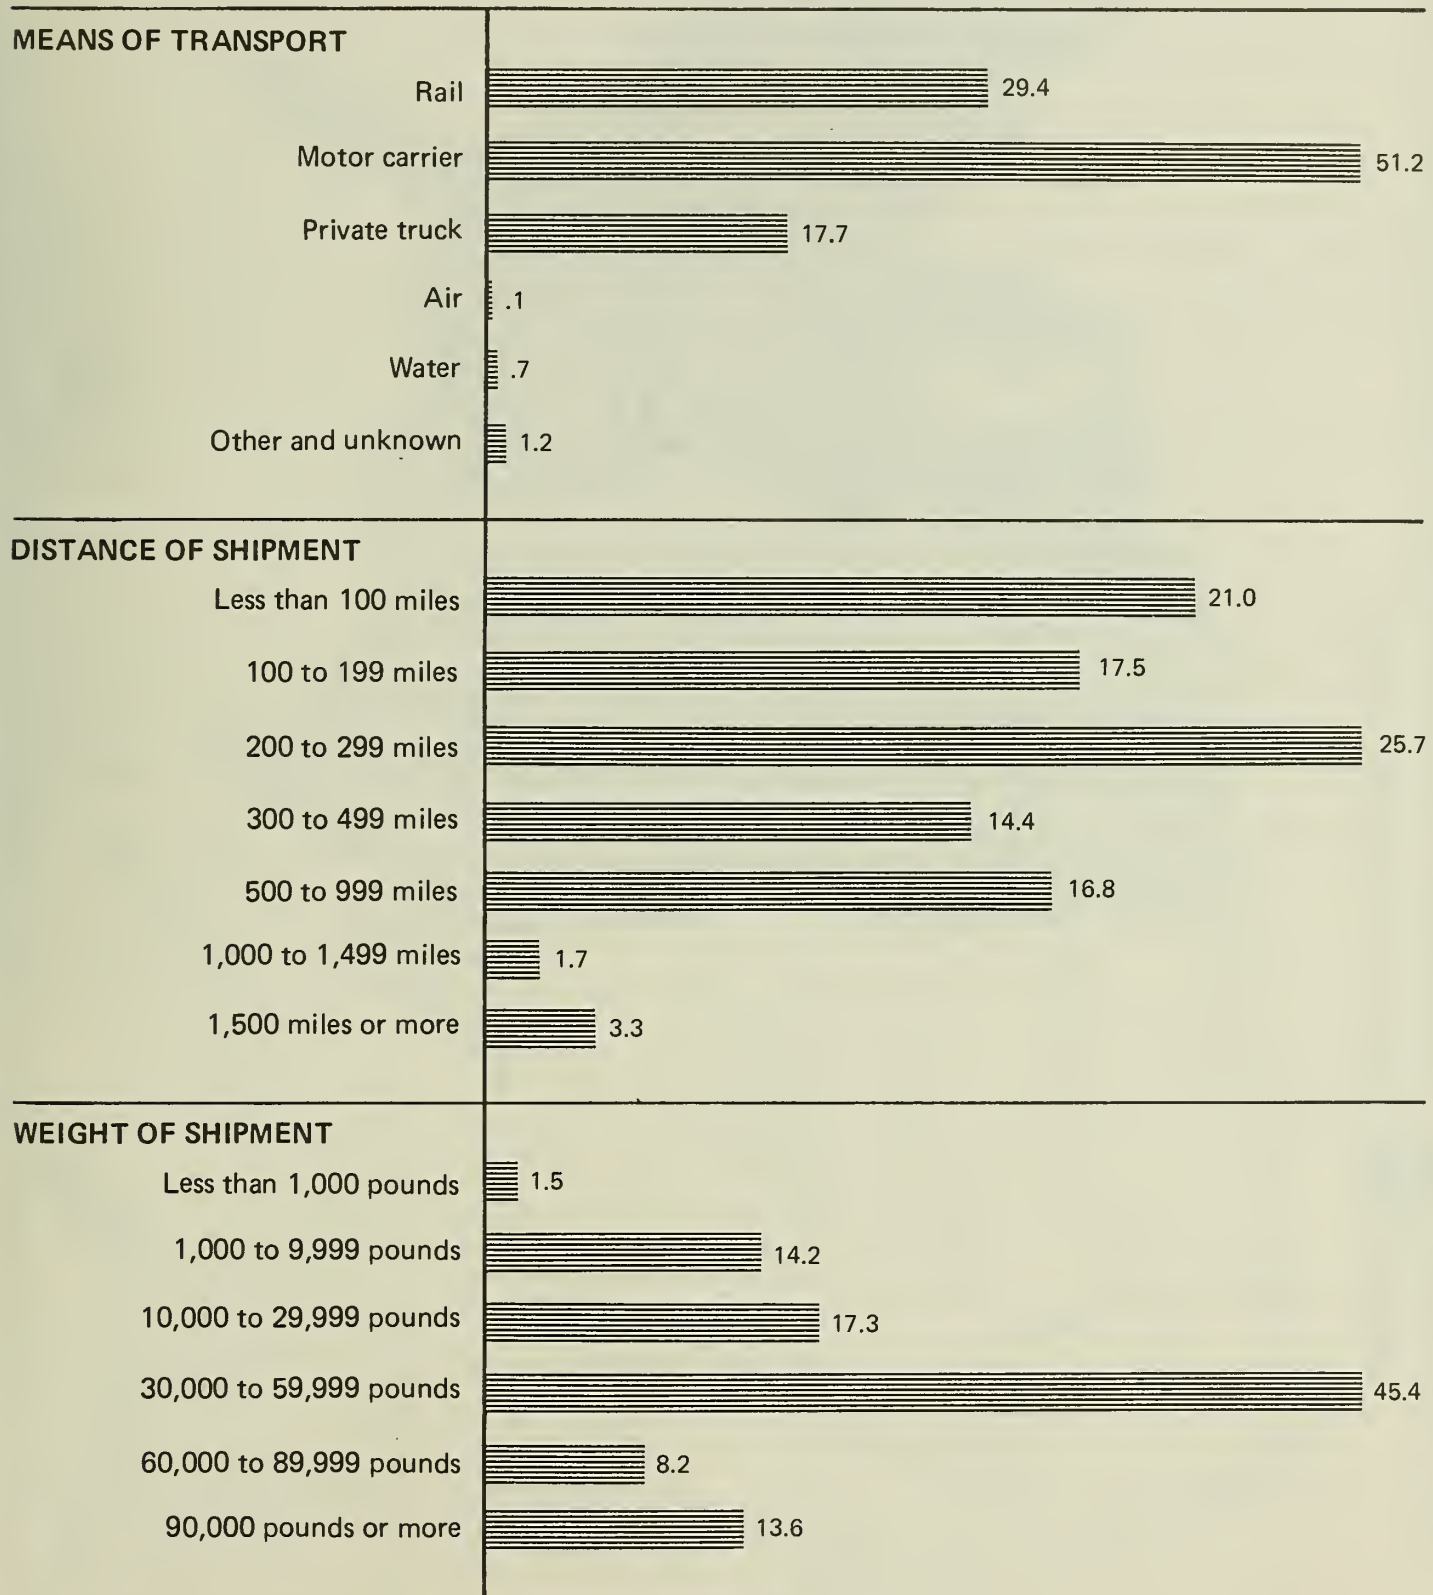

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								Sampling variability
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

TABLE 4. Percent Distribution of Commodities, by Production Area of Destination: 1972

Note: Detail may not add to total due to rounding.

SIC 20S was out of scope to the 1967 survey. However, for the 1972 survey, SIC 20S2, cookies and crackers, was included while SIC 20S1 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 39721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

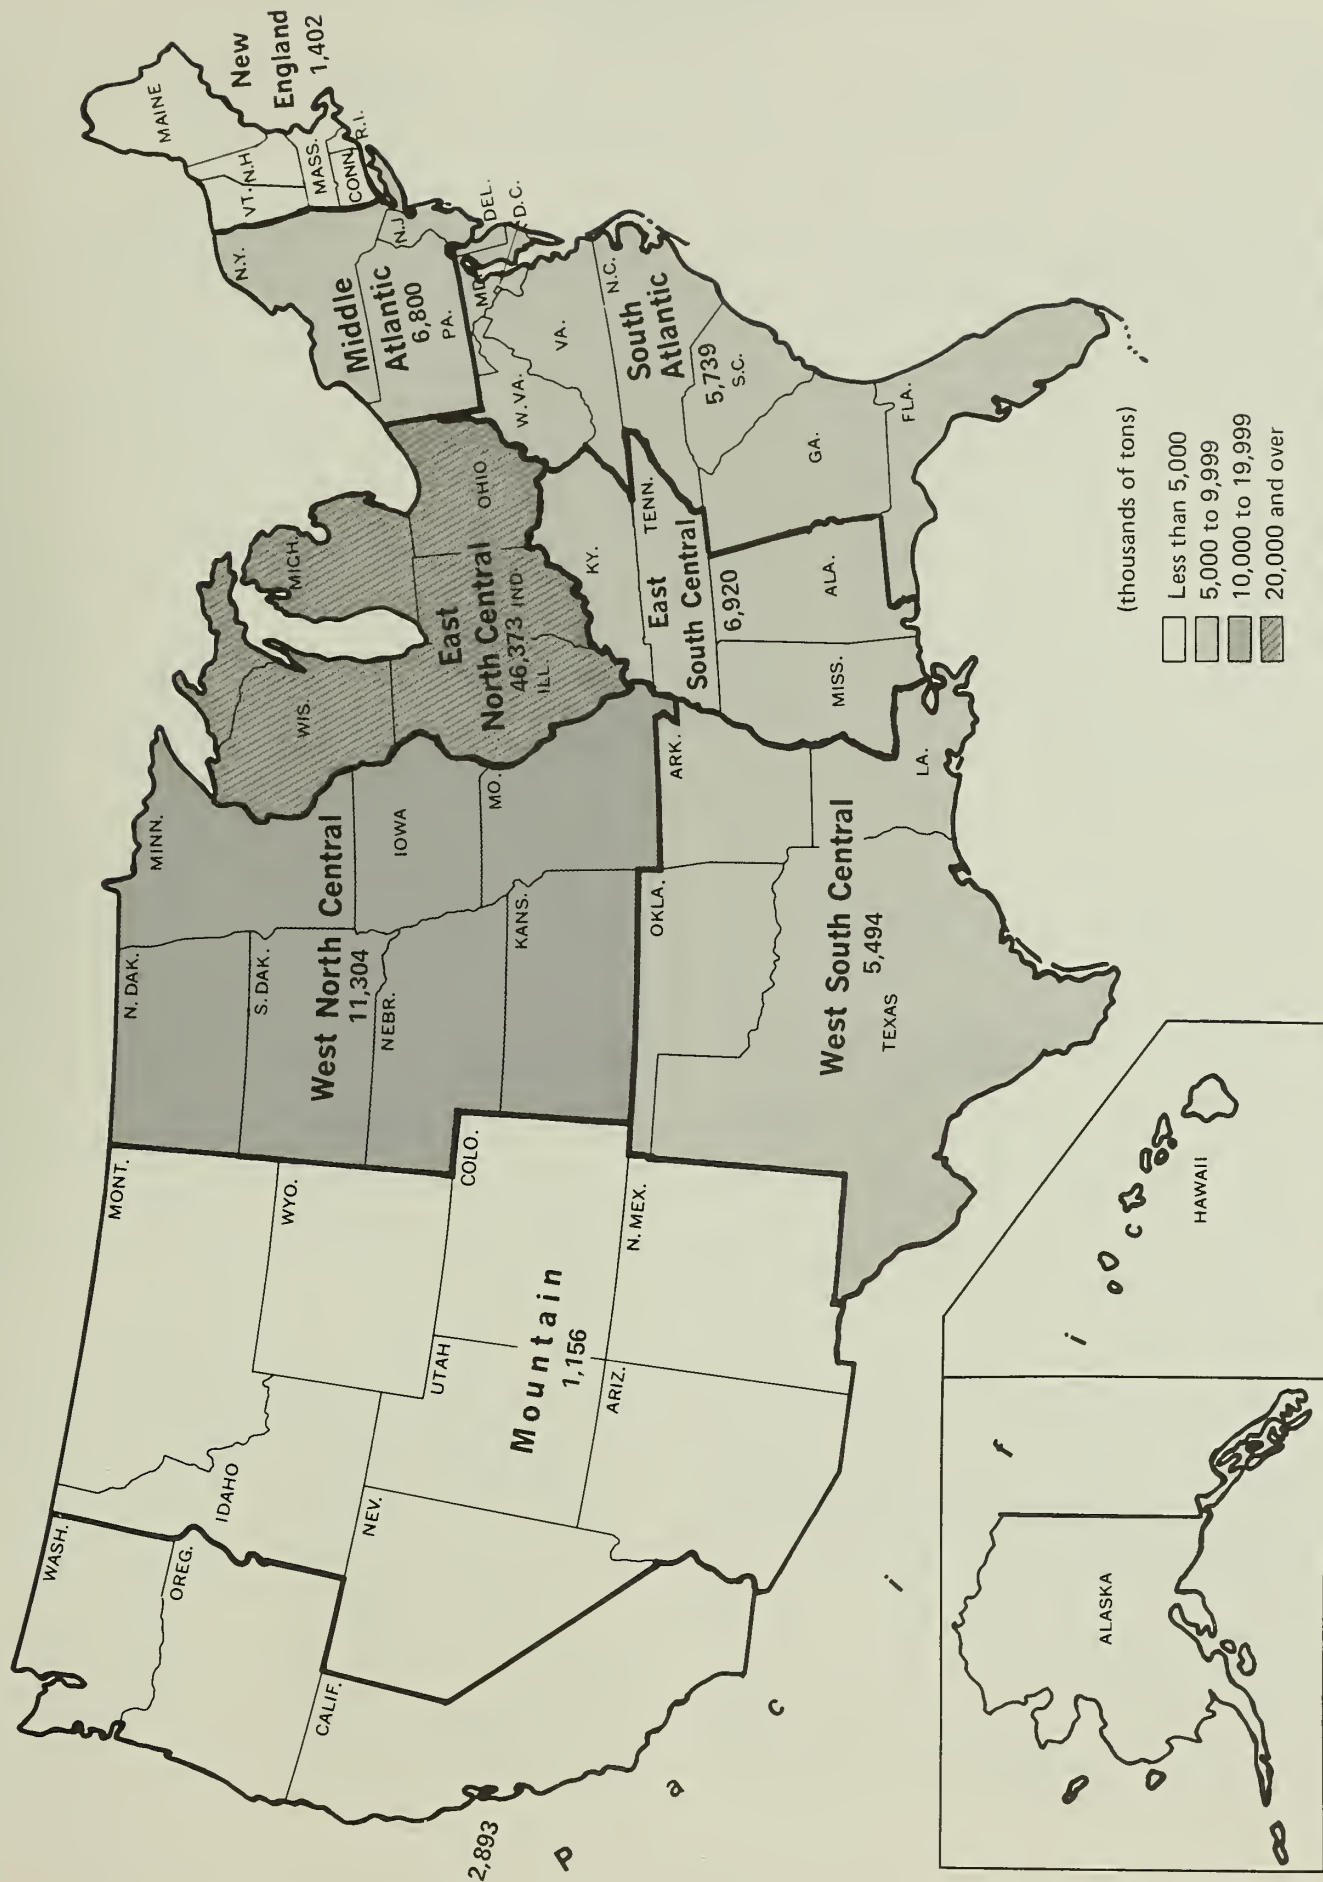

CHART 1.

ILLINOIS | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

Shipments, by Geographic Division of Destination: 1972
(Based on thousands of tons)

Note: See table 1 for estimates of sampling variability.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment							
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

CHART 1.

INDIANA | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

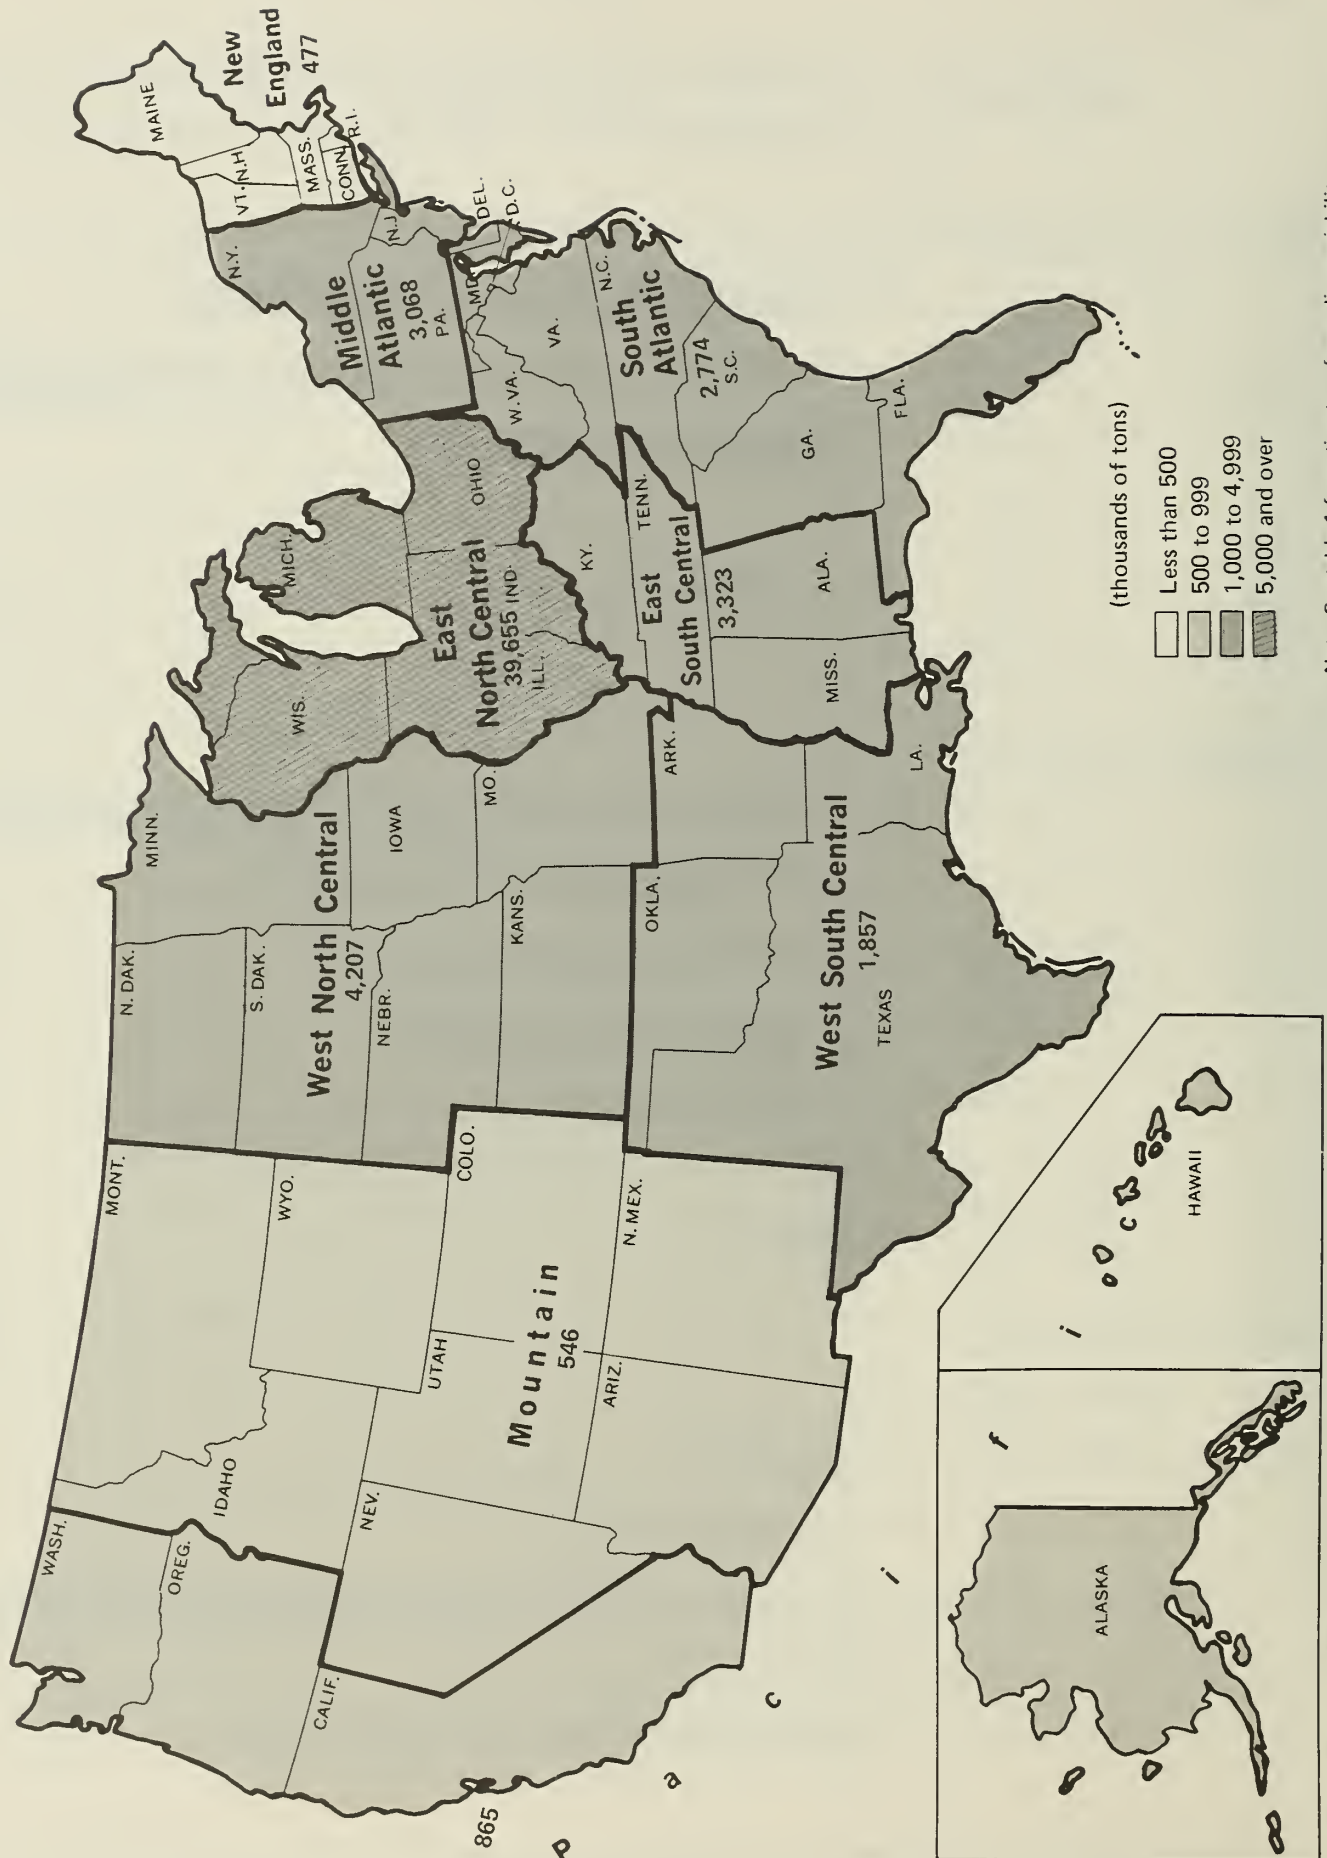

Note: See table 1 for estimates of sampling variability.

INDIANA

Shipments, by Geographic Division of Destination: 1972

(Based on thousands of tons)

Note: See table 1 for estimates of sampling variability.

TABLE 1. Percent Distribution of Commodities Shipped to Geographic Divisions, by Means of Transport: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sam- pling var- iability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero. (*) Data not published in 1967.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

CHART 1.

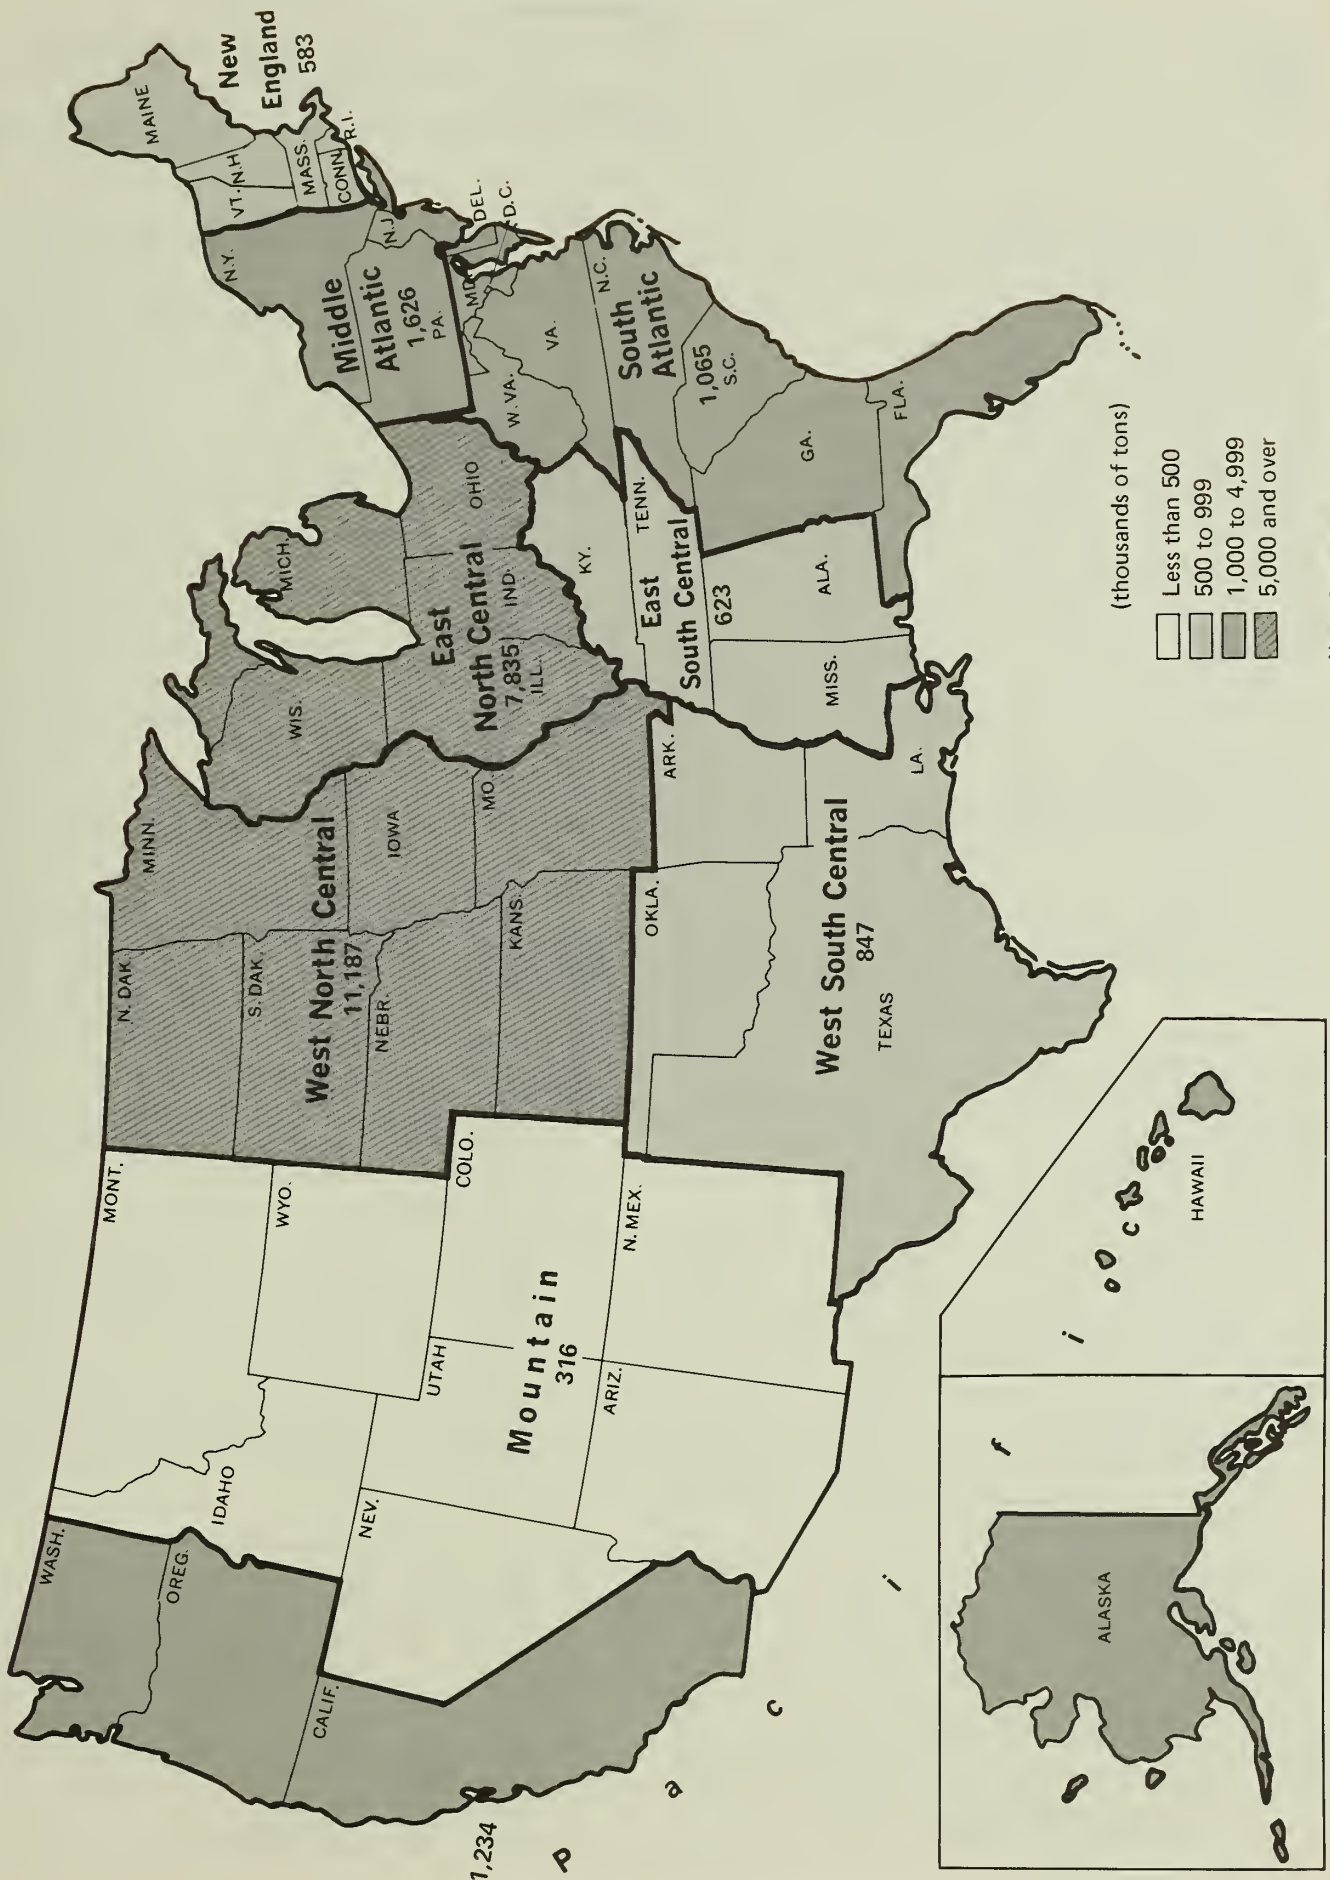

IOWA | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

IOWA

Shipments, by Geographic Division of Destination: 1972 (Based on thousands of tons)

Note: See table 1 for estimates of sampling variability.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

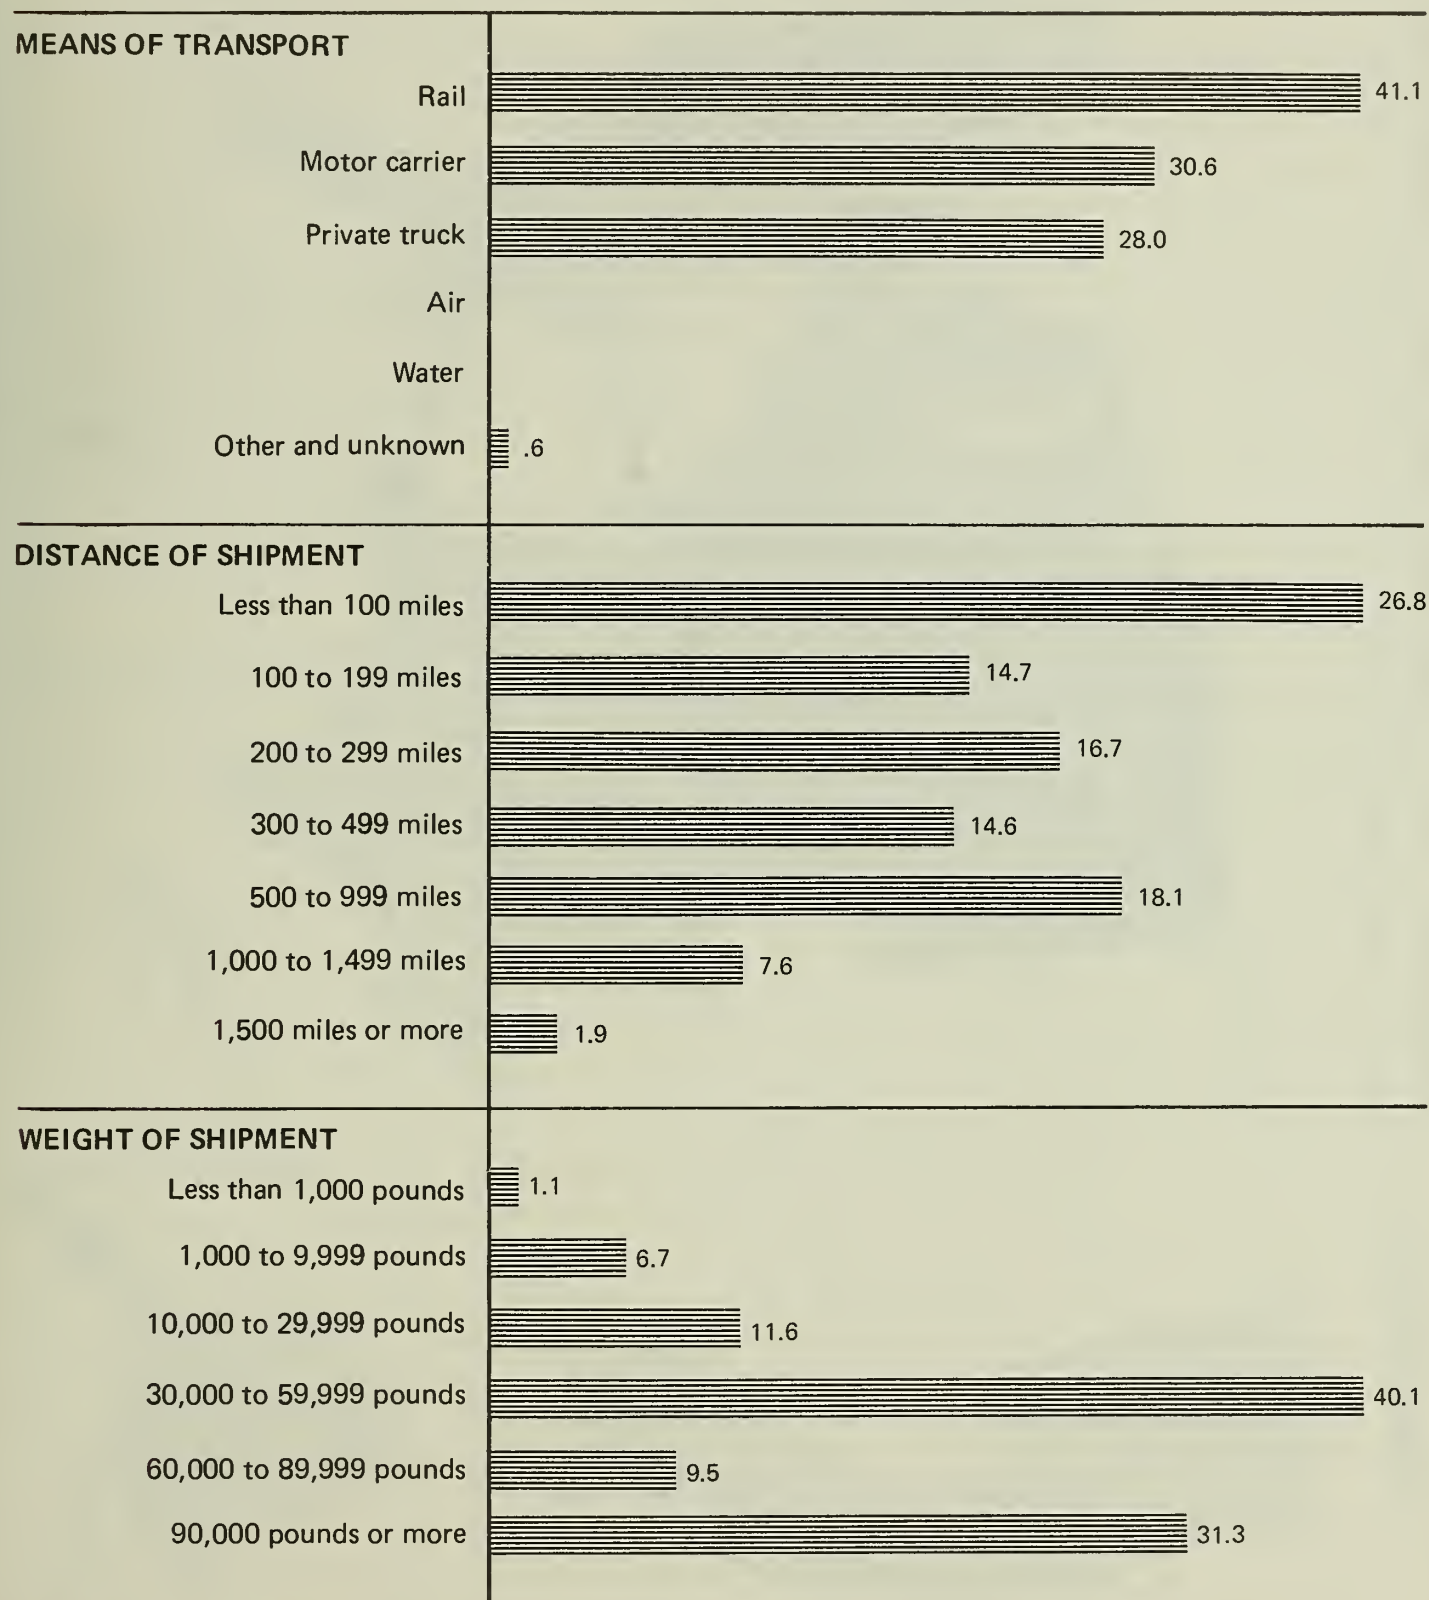

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

CHART 1.

MISSOURI | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

MISSOURI

Shipments, by Geographic Division of Destination: 1972 (Based on thousands of tons)

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero.

(X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								Sampling variability
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sam- pling var- iability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity.

— Represents or rounds to zero.

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

CHART 1.

WISCONSIN | *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

WISCONSIN

Shipments, by Geographic Division of Destination: 1972 (Based on thousands of tons)

Note: See table 1 for estimates of sampling variability.

BUREAU OF THE CENSUS

U.S. DEPARTMENT OF COMMERCE

TABLE 1. Percent Distribution of Commodities Shipped to Geographic Divisions,
by Means of Transport: 1972

A. Tons of Shipments

TCC code	Division of destination and commodity	Number (thousands of tons)	Percent distribution by means of transport								Sampling vari- ability
			All means of transport	Rail	Motor carrier	Private truck	Air	Water	Other	Unknown

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

38	INSTRUMENTS, PHOTO. AND MEDICAL GOODS, WATCHES AND CLOCKS.	5	100.0	1.2	2.0	18.5	5.9	46.8	5.6	20.4
39	MISCELLANEOUS PRODUCTS OF MANUFACTURING.	32	100.0	1.0	1.0	4.6	5.7	38.4	7.0	42.6
--	ALL OTHER MISCELLANEOUS.	1,043	100.0	15.0	11.2	9.1	11.3	37.5	3.2	13.1
----	ALL OTHER MISCELLANEOUS.	3,621	100.0	7.6	10.3	10.1	12.6	37.0	6.8	16.0
-----	ALL OTHER MISCELLANEOUS.	5,509	100.0	7.3	8.9	9.8	14.1	38.9	7.0	14.4
-----	ALL OTHER MISCELLANEOUS.	6,140	100.0	7.1	8.5	10.0	13.9	39.1	7.1	14.6

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

-----	ALL OTHER MISCELLANEOUS.	6,883	100.0	1.8	12.3	18.0	39.6	12.9	15.8

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Production Area 15—Continued

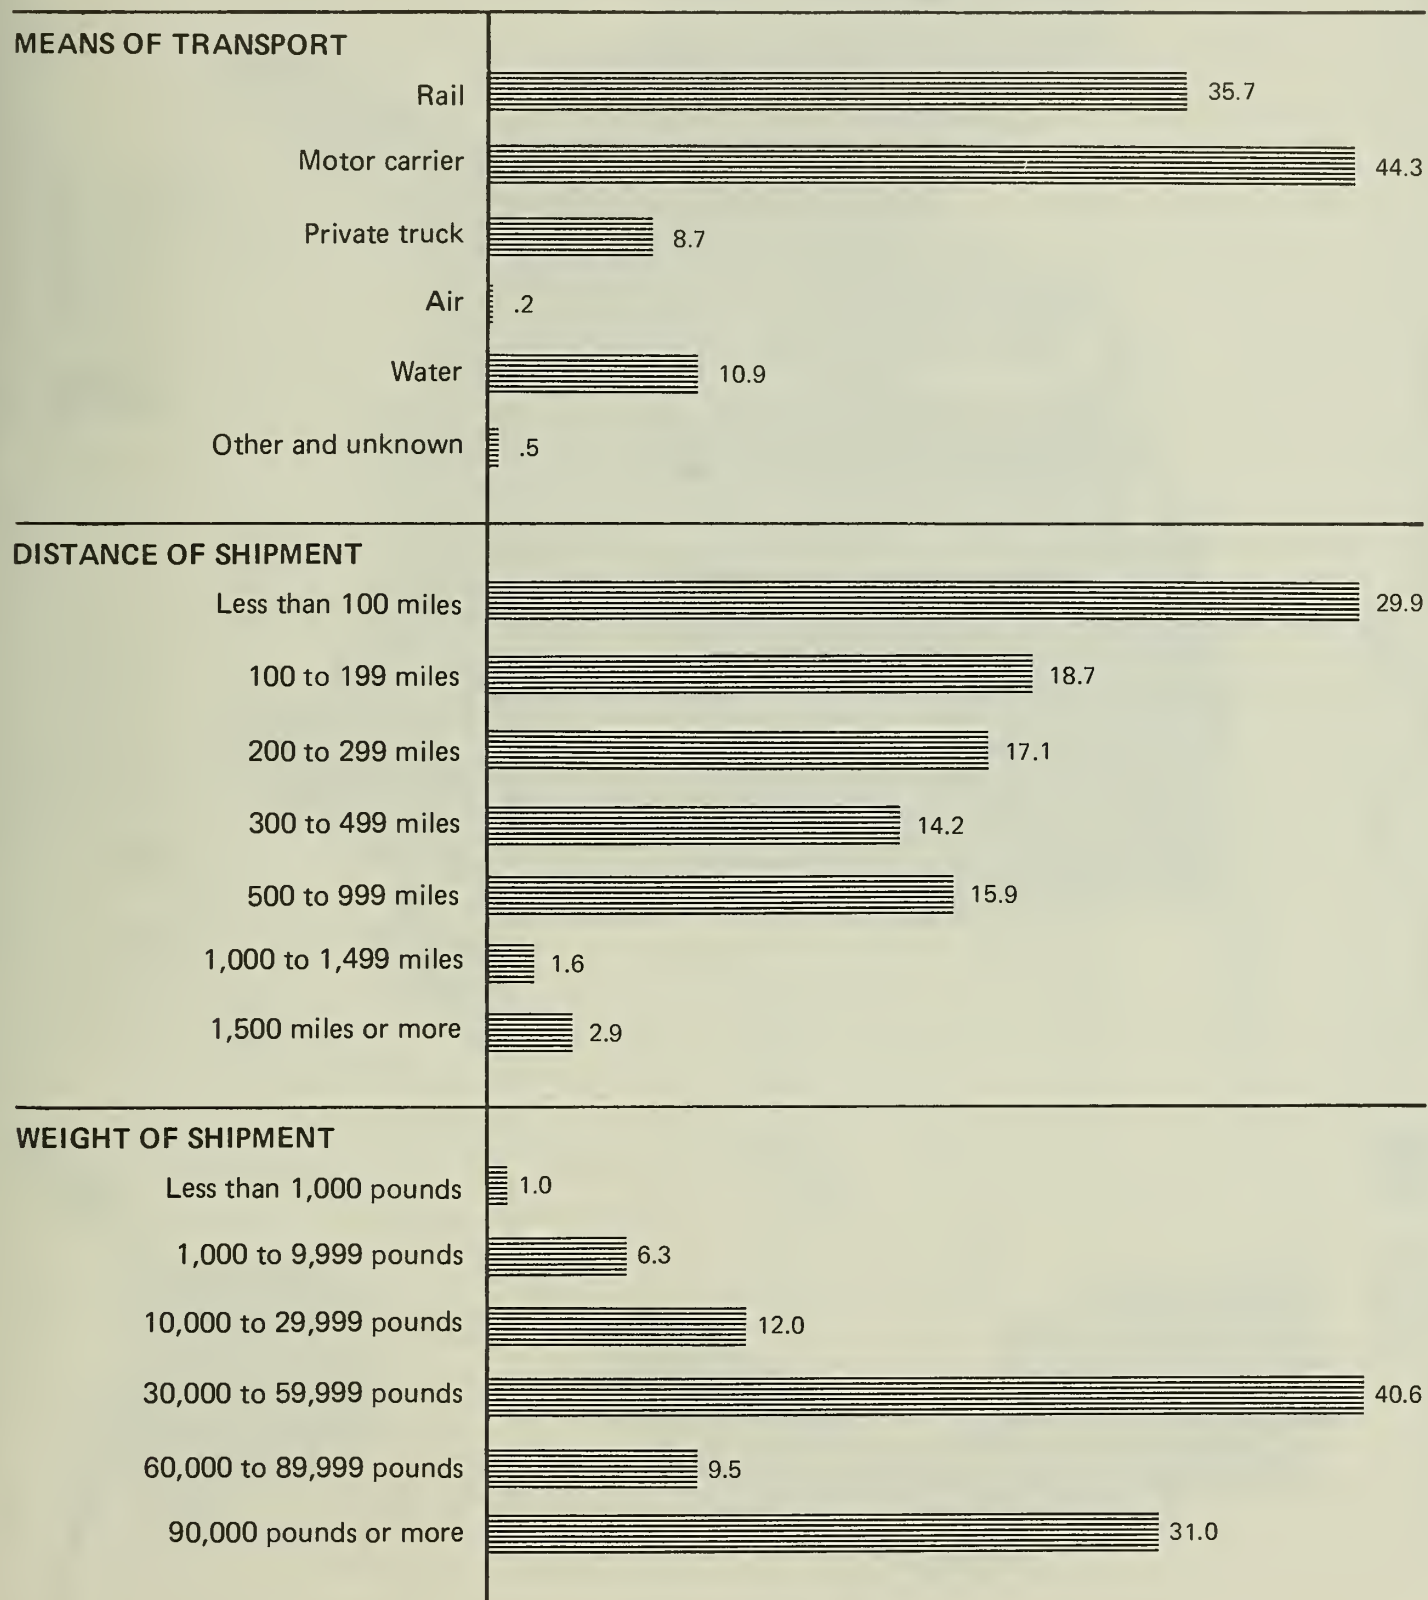

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								Sampling variability
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by weight of shipment							
			Total	Under 1,000 pounds	1,000 to 9,999 pounds	10,000 to 29,999 pounds	30,000 to 59,999 pounds	60,000 to 89,999 pounds	90,000 pounds and over	Sampling variability

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries) parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

- Represents or rounds to zero. (X) Not applicable.

Production Area 16

(Milwaukee, Kenosha and Racine
Standard Metropolitan Statistical Areas)

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity. — Represents or rounds to zero.

See numbered footnotes on reverse.

Production Area 16—Continued

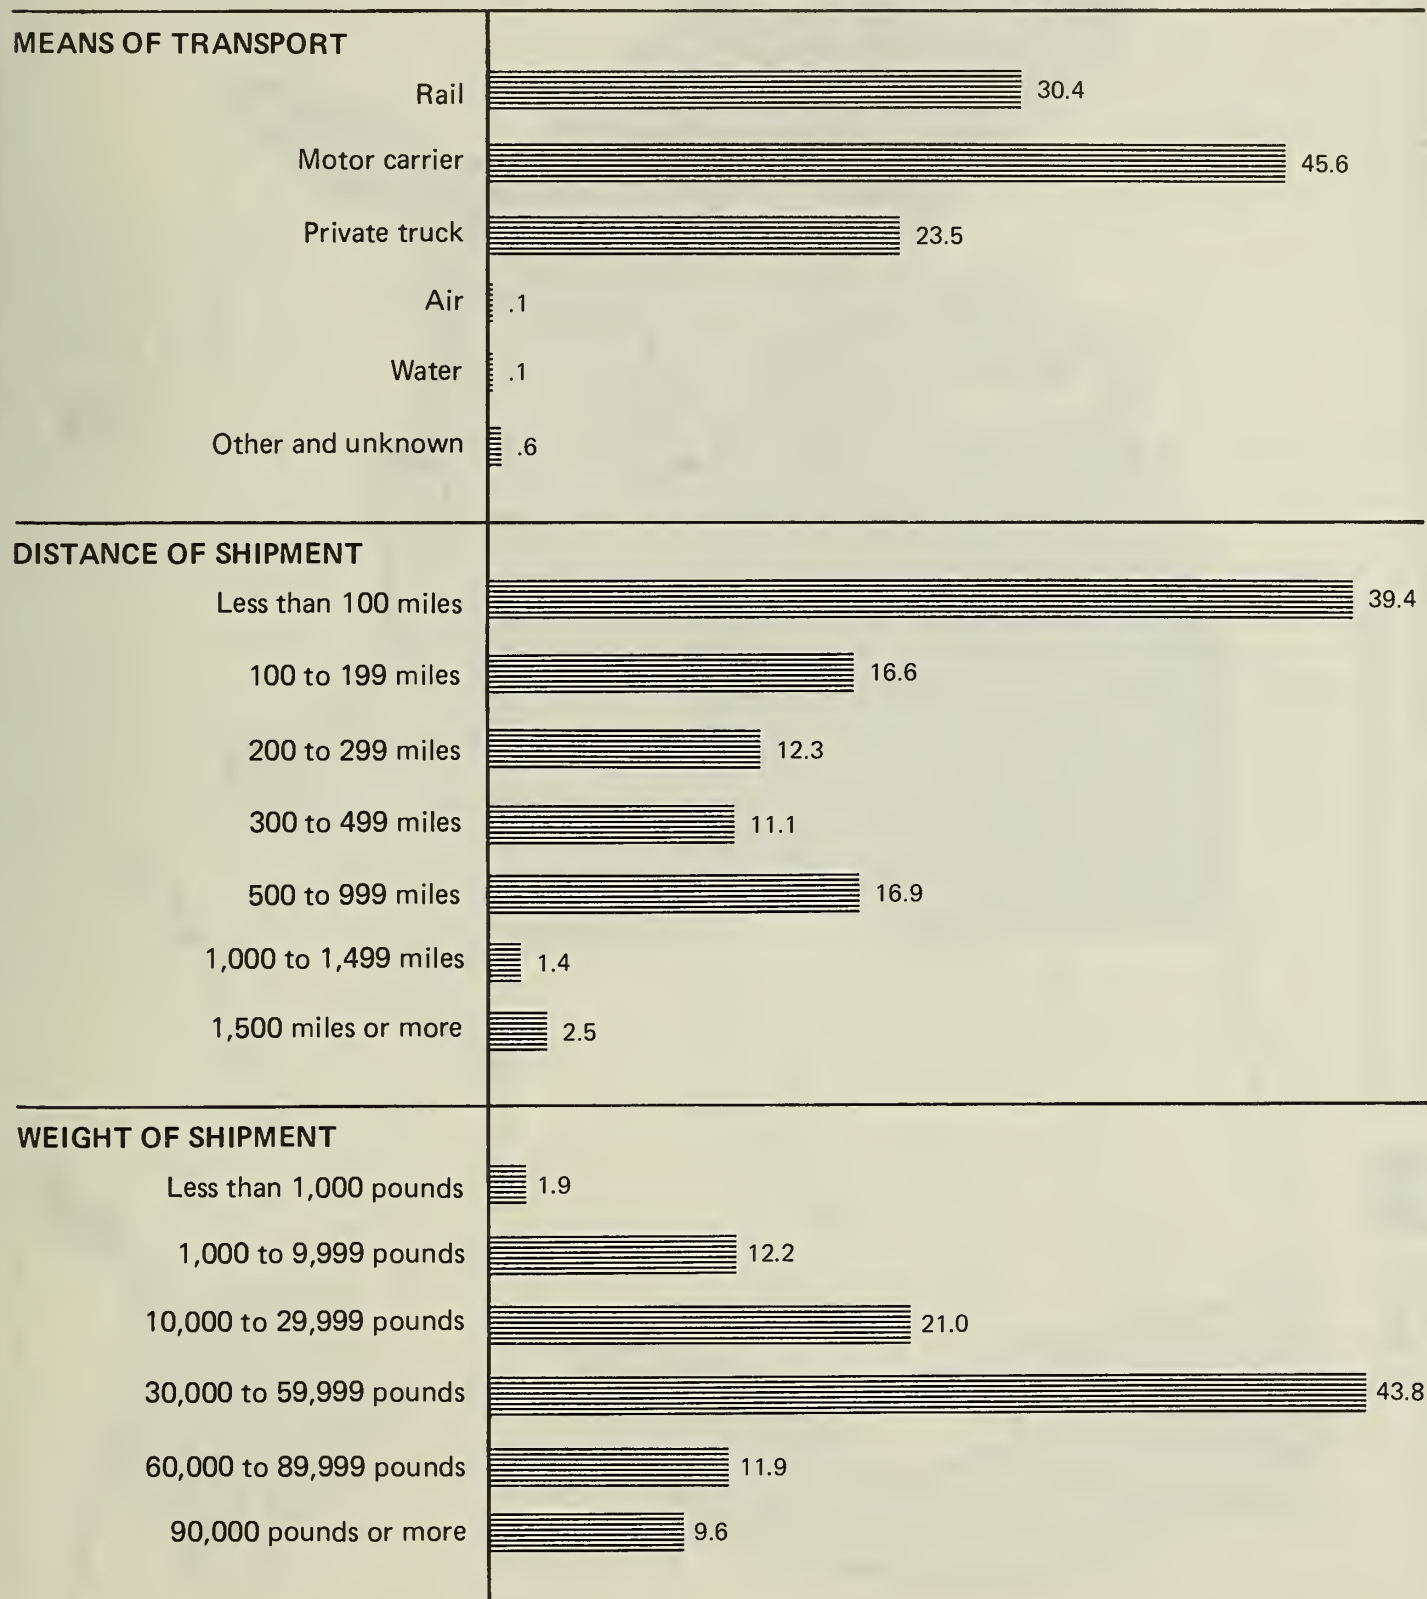

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

CHART 1.

PRODUCTION AREA **16** *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

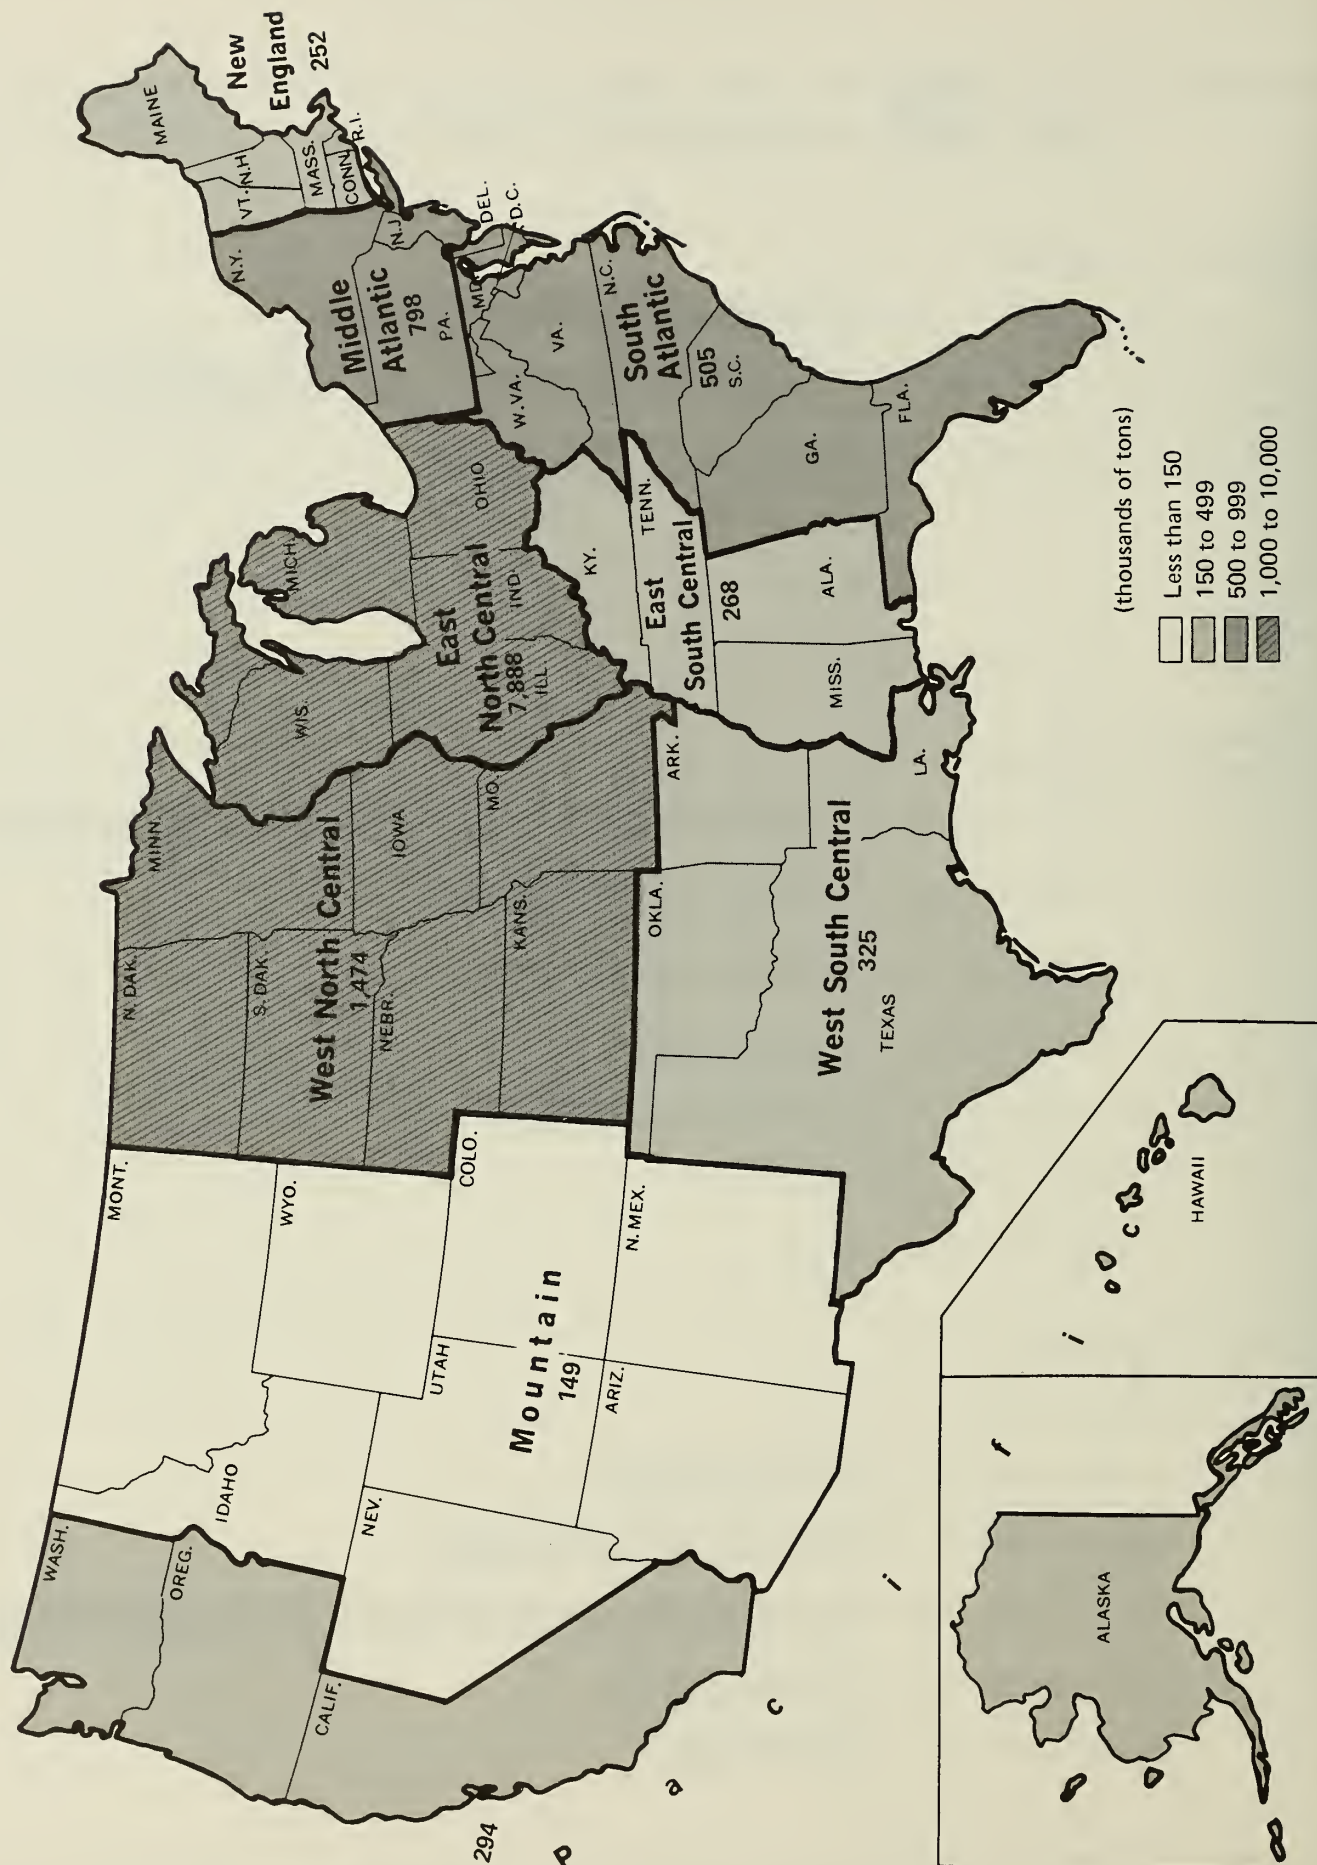

Note: See table 1 for estimates of sampling variability.

PRODUCTION AREA

16

Shipments, by Geographic Division of Destination: 1972 (Based on thousands of tons)

Note: See table 1 for estimates of sampling variability.

BUREAU OF THE CENSUS

U.S. DEPARTMENT OF COMMERCE

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero.

(X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

A. Tons of Shipments

TCC code	Commodity	Number (thousands of tons)	Percent distribution by distance of shipment								Sampling variability
			All distances	Under 100 miles	100 to 199 miles	200 to 299 miles	300 to 499 miles	500 to 999 miles	1,000 to 1,499 miles	1,500 miles and over

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

- Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries) parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

- Represents or rounds to zero. (X) Not applicable.

Production Area 17—Continued

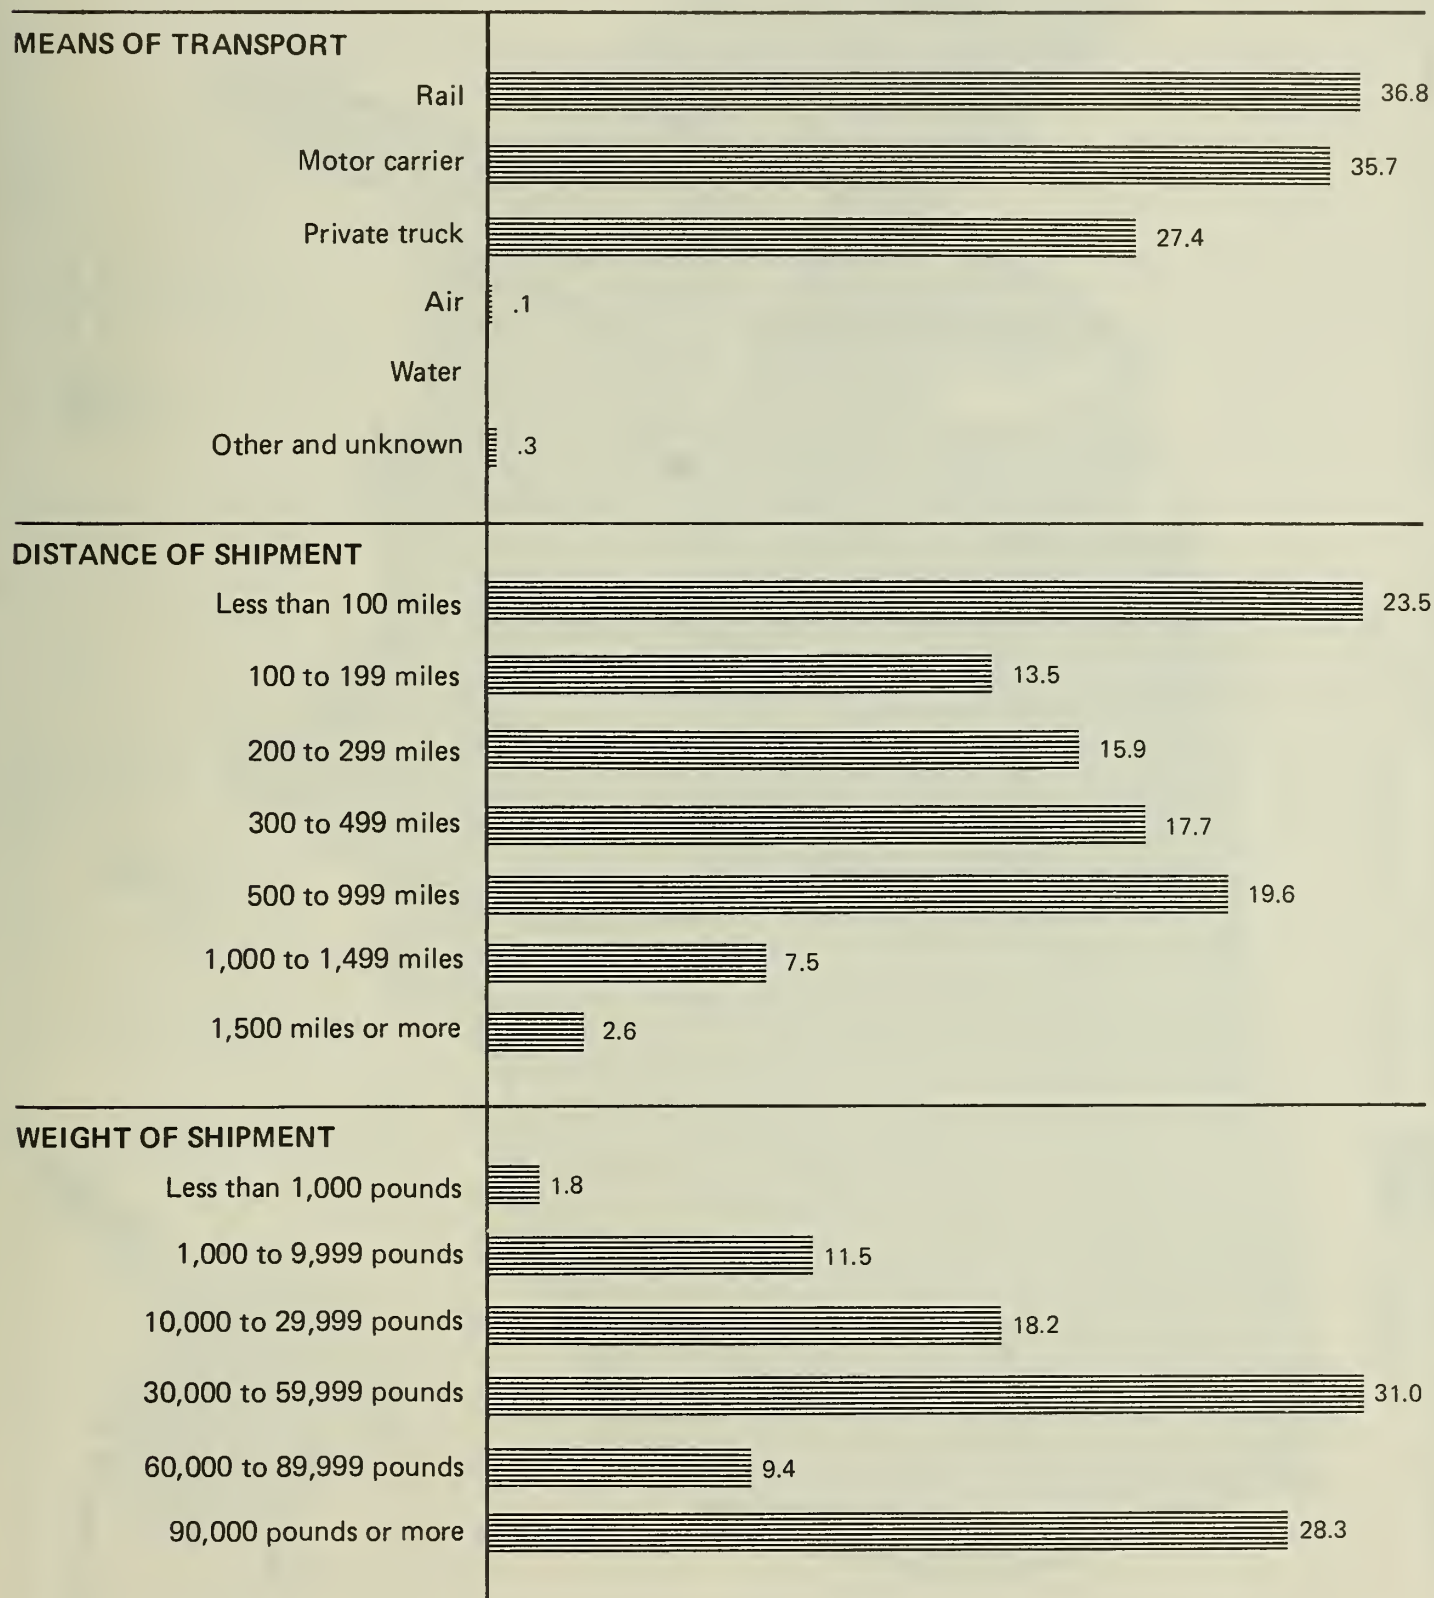

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero.

(X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries) parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

- Represents or rounds to zero. (X) Not applicable.

Production Area 18—Continued

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

TABLE 2. Percent Distribution of Commodities, by Distance of Shipment: 1972

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

— Represents or rounds to zero. (X) Not applicable.

TABLE 3. Percent Distribution of Commodities, by Weight of Shipment: 1972

-----	ALL OTHER MISCELLANEOUS	5,423	100.0	1.5	12.6	11.6	30.4	16.2	28.1

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 23999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries) parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

Note: See table 1 for estimates of relative sampling variability for tons originated by commodity. — Represents or rounds to zero.

*Production area 26 was added in 1972 due to increased industrial activity. No data is available for 1967.

See numbered footnotes on reverse.

Production Area 26—Continued

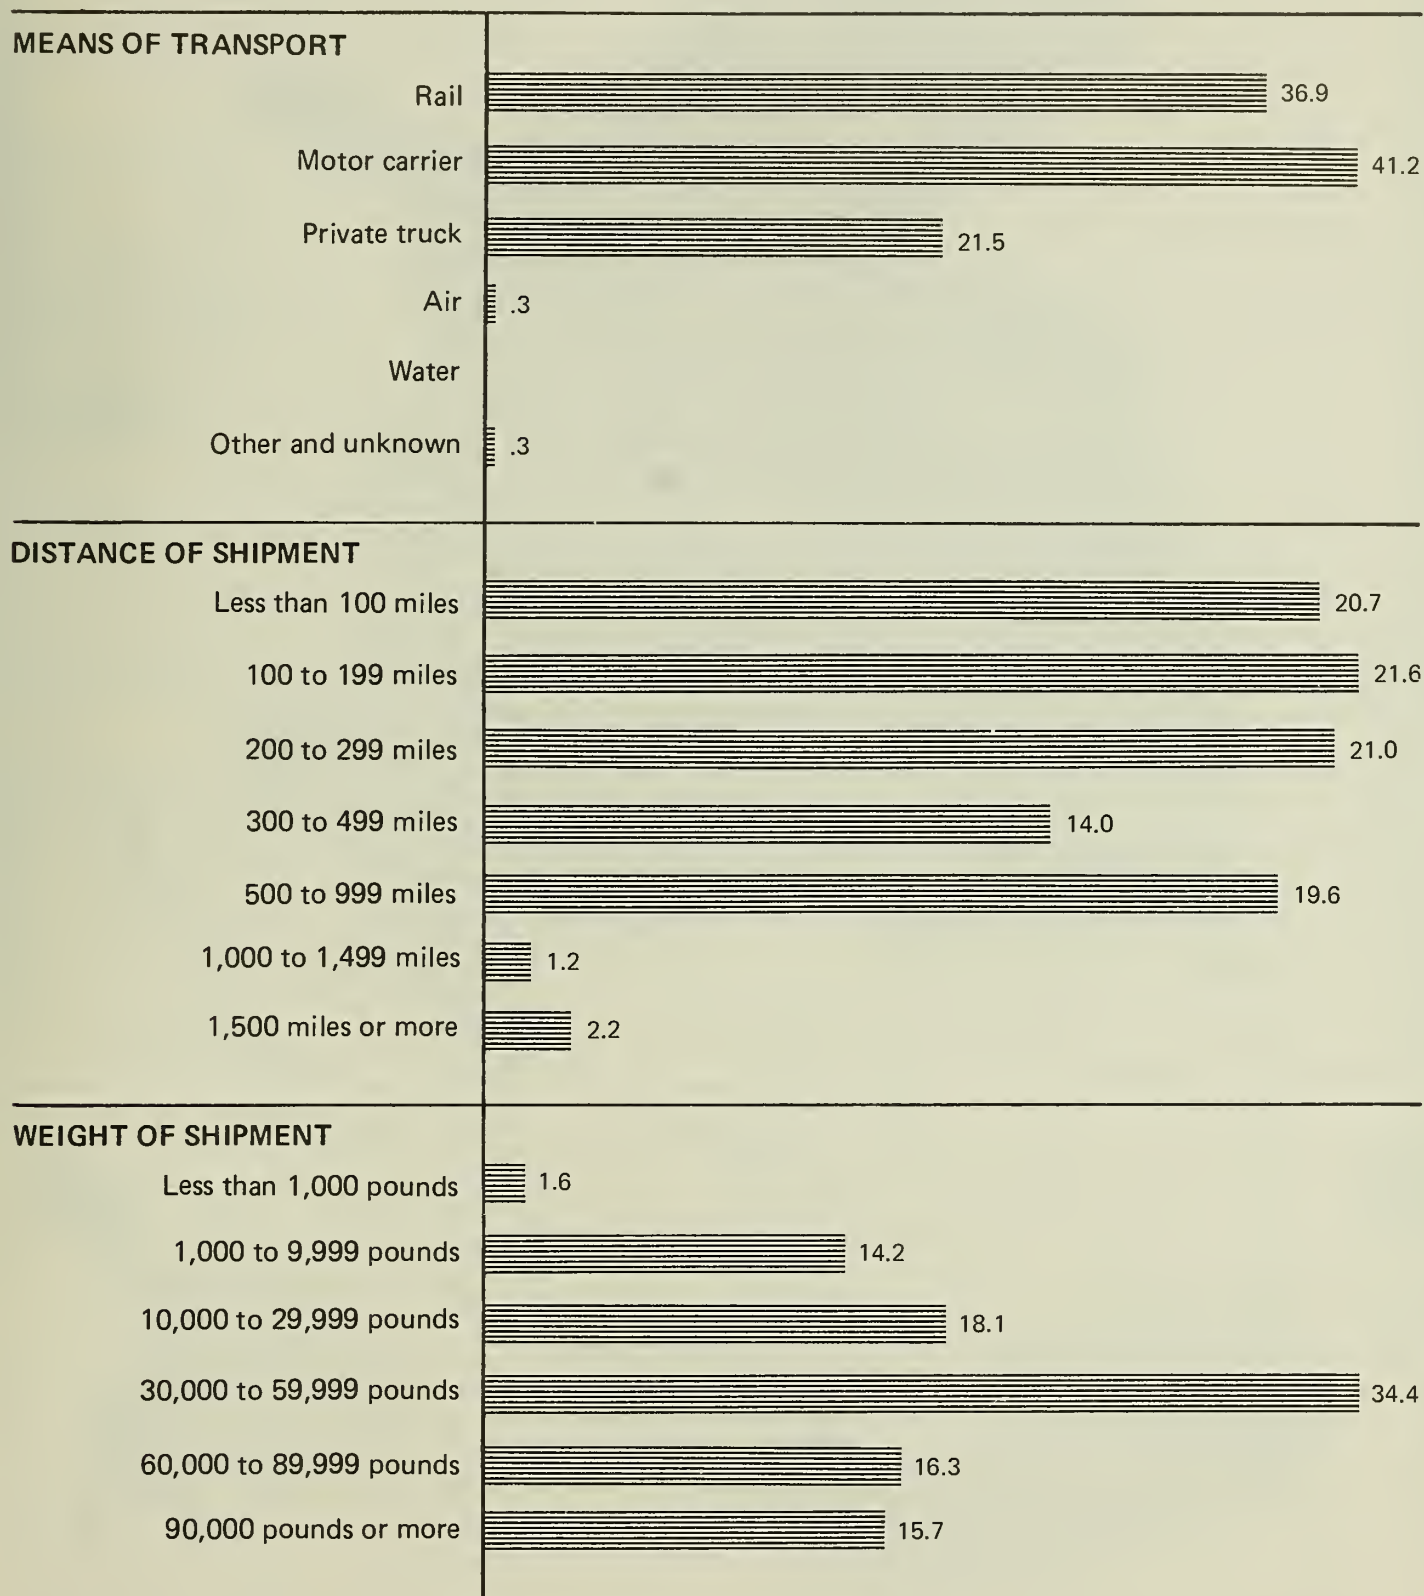

Summary of Shipments Originating in This Production Area: 1872 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.
SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Distances of shipments to foreign destinations are calculated only to the U.S. port of export.

— Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries) parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.

— Represents or rounds to zero. (X) Not applicable.

¹Production area 27 was added in 1972 due to increased industrial activity. No data is available for 1967.
 See numbered footnotes on reverse.

Production Area 27—Continued

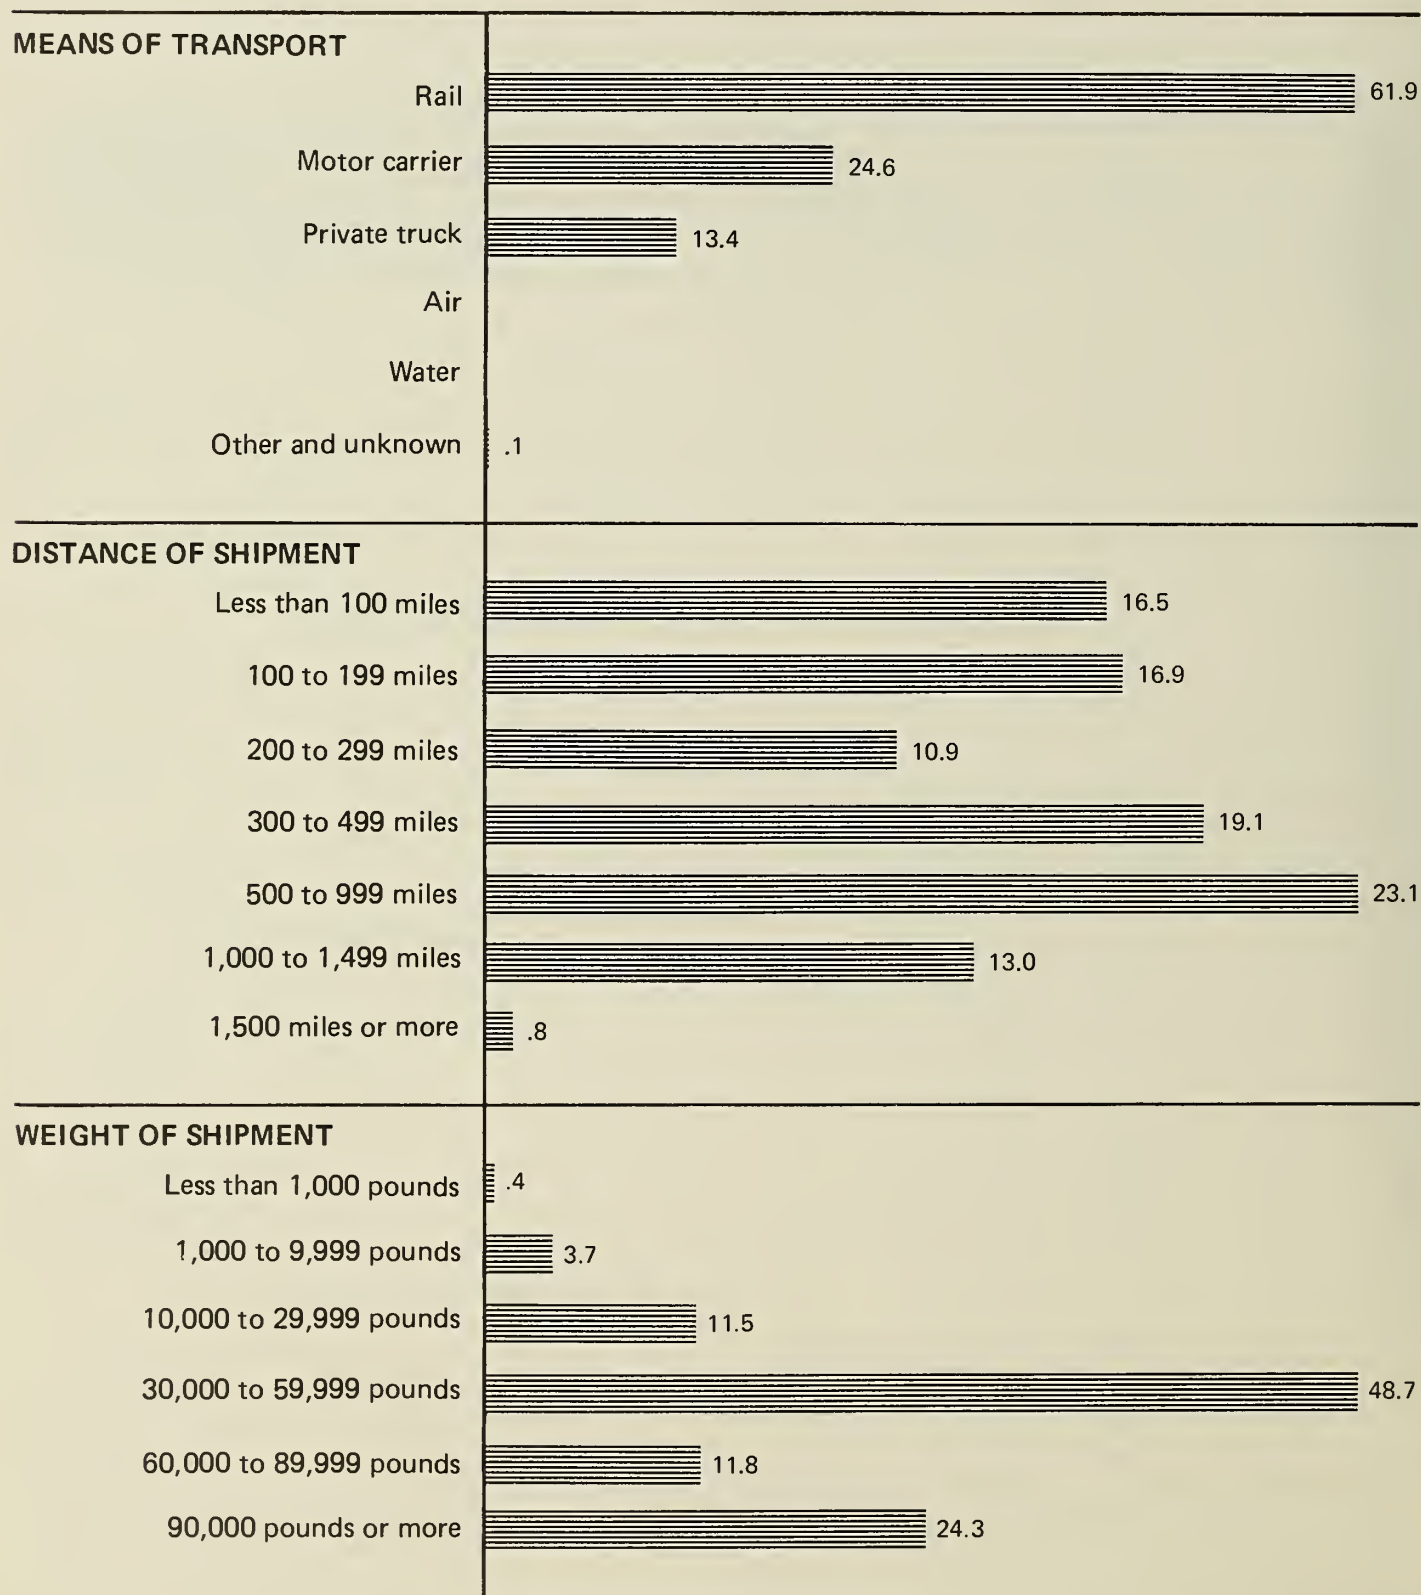

Summary of Shipments Originating in This Production Area: 1972 and 1967

Footnotes

¹ Ton-miles are the product of weight times distance on a straight-line distance basis. ² Average length of haul is based on straight-line miles from plant to customer or redistribution point, weighted by tonnage shipped (i.e., ton-miles divided by tons). Rail short-line and highway direct-route distances average about 24 and 21 percent, respectively, longer than straight-line distances. ³ Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii. ⁴ Distances of shipments to foreign destinations are calculated only to the U.S. port of export. ⁵ Includes only intercity shipments within the production area (those that originated in one city in this area and terminated in another city in this area).

CHART 1.

PRODUCTION AREA **27** *Percent Distribution of Shipments, by Characteristic: 1972 (Based on thousands of tons)*

Note: See table 1 for estimates of sampling variability.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 contiguous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

- Represents or rounds to zero. (X) Not applicable.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries), parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

Includes only shipments represented by bills of lading and sales invoices. Summary records which did not show individual weights of shipments are not included.

Note: Detail may not add to total due to rounding.

SIC 205 was out of scope to the 1967 survey. However, for the 1972 survey, SIC 2052, cookies and crackers, was included while SIC 2051 remained out of scope to the survey.

Shipments excluded from the survey are those moving by pipeline (primarily petroleum products from refineries) parcel post shipments, and commodities moved by own power (motorized vehicles, aircraft, etc.) or towed (prefabricated buildings, etc.). Local shipments (commodities shipped less than 25 miles from the plant) and shipments within the same city are also excluded. Shipments to Alaska and Hawaii from the 48 conterminous States and the District of Columbia are included; however, no data were obtained for shipments originating in Alaska and Hawaii.

For the 1972 published data, the following TCC codes have been combined: 28181 and 28182; 28999 and 28998; 30619 and 30618; 30719, and 30721 to 30729; 34299 and 34298; 34999 and 34998; and 37429 and 37428.

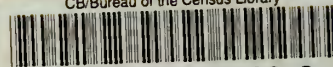

Two production areas were added in 1972 due to increased industrial activity. These are production area 26, Indianapolis, Muncie, and Anderson and production area 27, Kansas City, St. Joseph, and Topeka.
